

ELP-34000C

ADVANCED DC ELECTRONIC LOADS

POSITIVE PROBLEM SOLVING 

With wide voltage and current ranges the ELP-34000C is an excellent series of general purpose electronic loads.

Dual setting and measurement ranges combined with 5 digit displays provide for high resolution. Dynamic operation with adjustable rise, fall and plateau times enable real world loads to be accurately simulated. Dedicated short circuit, OCP and OPP tests allow power supply behaviour and protection mechanisms to be characterised. Commonly used load set-ups can be easily and quickly saved and recalled from the front panel. Should remote control be required then LAN, USB, RS-232 or GPIB cards can be specified.

- + 9 Different Operating Modes**
- + 5 Digit Displays for V, I & W**
- + Short Circuit Test Function**
- + Adjustable Slew Rates**
- + Dual Setting Ranges**
- + Front Panel Memory**

HIGHLIGHTED STANDARD FEATURES

FRONT PANEL MEMORY

150-state memory is available as standard, which allows quick initialisation and limit-setting of the unit. This makes the ELP-34105 both dependable, and mobile as an on-site load tester.

2x^{4x} SEQUENCING FUNCTION

A sequencing function means that stored settings can be implemented against time, enabling the unit to carry out state-dependant and complex test routines without the need for a computer interface.

BATTERY DISCHARGE TESTS

The ELP-34000C series has a total of 5 battery discharge modes. These simplify test set up for users, whilst avoiding conditions which could result in permanent battery damage due to over or under voltage.

CODE	DESCRIPTION
/GPIB	IEEE488.2 (GPIB) interface card
/RS232	RS-232 interface card
/USB	USB interface card
/LAN	LAN interface card
/0001	1m IEEE 488.2 cable
/0002	2m IEEE 488.2 cable
/0003	2m RS-232 cable
/1KAxM	1000A load cable (1m - 5m available, please specify)

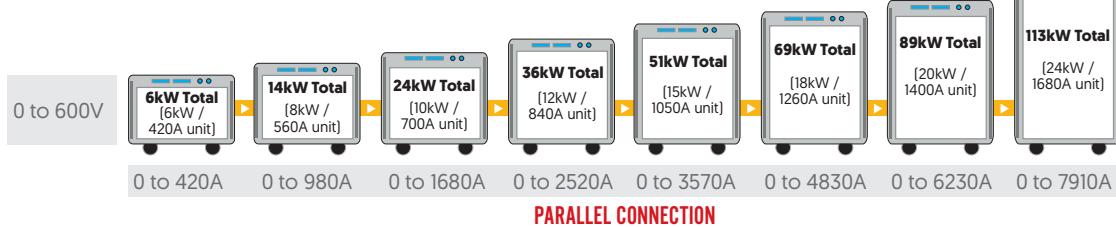

HIGHLIGHTED OPTIONS

USB RETROFITABLE INTERFACES

LAN, USB, RS-232 and GPIB interface cards can be easily retro-fitted or even swapped in the field by the user. As highlighted, this is possible by simply removing the two screws and replacing the interface.

MASTER/SLAVE FUNCTIONALITY

PARALLEL CONNECTION

Up to eight units from the ELP-34000C series can be arranged in parallel configurations. It is possible to connect 6kW to 24kW models with the same nominal voltage with different nominal power values, up to a maximum of 192kW. For example, an 8kW system and a 18kW system can be operated together. 24kW/150V systems are an exception, as they can only be operated in parallel connection with models of the exact same specifications. The diagram above shows eight different 600V models from the ELP-34000C family operating in parallel together. When operating in master/slave operation, a number of test modes are not available. Please see the table below for more information.

CHARACTERISED VALUES

150V ELP-34000C series models are able to operate at maximum current across most of its voltage range. This allows one system to test many different types of devices. When operating below 0.7V, the maximum amount of current that the load can sink decreases.

Every effort is made to ensure that the information provided within this technical summary is accurate. However, ETPS Ltd must reserve the right to make changes to the published specifications without prior notice. Where certain operating parameters are critical for your application we advise that they be confirmed at the time of order. ETPS Ltd specialises in modifying its proven platforms to suit your needs. Please contact our office if your requirement is non-standard. Please note that your actual unit may differ from those shown.

CHARACTERISED VALUES

600V ELP-34000C series models are able to operate at maximum current across most of its voltage range. This allows one system to test many different types of devices. When operating below 10V, the maximum amount of current that the load can sink decreases.

Every effort is made to ensure that the information provided within this technical summary is accurate. However, ETPS Ltd must reserve the right to make changes to the published specifications without prior notice. Where certain operating parameters are critical for your application we advise that they be confirmed at the time of order. ETPS Ltd specialises in modifying its proven platforms to suit your needs. Please contact our office if your requirement is non-standard. Please note that your actual unit may differ from those shown.

CHARACTERISED VALUES

1200V ELP-34000C series models are able to operate at maximum current across most of its voltage range. This allows one system to test many different types of devices. When operating below 15V, the maximum amount of current that the load can sink decreases.

Every effort is made to ensure that the information provided within this technical summary is accurate. However, ETPS Ltd must reserve the right to make changes to the published specifications without prior notice. Where certain operating parameters are critical for your application we advise that they be confirmed at the time of order. ETPS Ltd specialises in modifying its proven platforms to suit your needs. Please contact our office if your requirement is non-standard. Please note that your actual unit may differ from those shown.
